

## UPDATE ON MOUNT PEAKE OFFTAKE AGREEMENTS

Following an extensive and ongoing review of offtake agreements for the Mount Peake Vanadium-Titanium-Iron Project (the "Project"), the Board of TNG Limited (ASX: TNG) ("TNG" or the "Company") advises that:

1. Notice of termination has been provided to Gunvor Singapore Pte Ltd in respect of the Life-of-Mine Offtake and Marketing Agreement (see ASX announcement of 15 October 2020) for 40% of the vanadium pentoxide intended to be produced from the Project, given the conditions precedent have not been satisfied.
2. Agreement has been reached with Vimson Group, through its Singapore-based, wholly-owned subsidiary V.M. SALGAOCAR & Bro. (Singapore) Pte. Ltd, to extend the Life-of-Mine Offtake and Marketing Agreement (see ASX announcement of 27 July 2020), for up to 100% of high purity iron products intended to be produced from the Project.

### Comment from Chair

Mr Grant Wilson commented:

*"The review that is currently underway is all-encompassing and focused on defining a coherent and credible strategy for Project delivery at Mount Peake. It is fundamentally necessary to include the Company's offtake and financing arrangements as part of the review, and to ensure that the Company abides strictly by its legal obligations in making decisions.*

*It is also important that such arrangements play a strongly facilitative role in advancing Project delivery. And that the Company's posture in offtake and project finance is highly attuned to shifting global dynamics in respect of critical minerals and sustainability.*

*I am looking forward to progressing these areas on behalf of the Company next year".*

Ends

This announcement is authorised by the Board of the Company.

### About TNG

TNG is a mineral resource and processing technology company focussing on building a world-scale strategic metals business based on its flagship 100%-owned Mount Peake Vanadium-Titanium-Iron Project in the Northern Territory. Located 235km north of Alice Springs, Mount Peake will be a long-life project producing a suite of high-quality, high-purity strategic products for global markets including vanadium pentoxide, titanium dioxide pigment and iron ore fines. The project, which is expected to be a top-10 global producer, has received Major Project Status from the Australian Federal Government and the Northern Territory Government.

TNG is also advancing a green energy strategy with the dual objective of offsetting carbon emissions from its planned future operations and generating new business opportunities in the alternative energy market to create additional shareholder value, with a focus on green hydrogen and vanadium redox flow batteries.

### **Forward-Looking Statements**
